

SUPPLEMENT OF THE CATALOGUE OF LDE FLARES

A. Antalová
Astronomical Institute, Slovak Academy of Sciences,
059 60 Tatranská Lomnica, Czechoslovakia

Received 21 September 1987

ABSTRACT. The catalogue of LDE flares (Antalová, 1987) is the initial observational material for studying the fluctuations in the occurrence of long-lived X-ray flares in the course of two 11-year cycles (part of cycle 20 and cycle 21). The geoeffectiveness of LDE flares increases the demands on the completeness of the catalogue and on the homogeneous selection of this type of flares. The Supplement to the Catalogue gives not only new LDE flares, observed during the latter months of cycle 21 (April 1986 - June 1987), but complements the data on LDE flares of the whole period treated (1969 - 1986).

ДОПОЛНЕНИЕ К КАТАЛОГУ ВСПЫШЕК С МЕДЛЕННЫМ СПАДОМ МЯГКОГО РЕНТГЕНОВСКОГО ИЗЛУЧЕНИЯ. Каталог ЛДЭ вспышек (Анталова, 1987) представляет исходный наблюдательный материал для изучения флуктуаций в появлении долгодлительных рентгеновских вспышек, возникших в течении двух 11-летних циклов солнечной деятельности (в части 20-ого и в целом 21-ом циклах). Геоэффективность ЛДЭ вспышек повышает запросы на полноту Каталога и однородность селекции вспышек этой группы. Дополнение к Каталогу приводит не только список новых ЛДЭ вспышек, которые возникли к концу 21-ого цикла (апрель 1986 - июнь 1987 г.) но и укомплектовывание данных о ЛДЭ вспышках за весь обработанный промежуток времени (1969 - 1986).

DOMINOK KU KATALÓGU LDE ERUPCIÍ. Katalóg LDE erupcií (Antalová, 1987) je východným materiálom pre štúdium fluktuácií vo výskyte dlhotrvajúcich röntge-

nových erupcií v priebehu dvoch 11-ročných cyklov slnečnej aktivity (časť 20-teho a celý 21. cyklus). Geoeфекtívnosť LDE erupcií zvyšuje nároky na úplnosť katalógu a homogénny výber erupcií tohto typu. Doplnok ku katalógu uvádza nielen nové LDE erupcie, ktoré boli pozorované v posledných mesiacoch 21. cyklu (apríl 1986 - jún 1987), ale tiež dopĺňa údaje o LDE erupciách z celého spracovávaného obdobia (1969 - 1986).

1. INTRODUCTION

The purpose of this paper is to supplement the published Catalogue of LDE flares (Antalová, 1987) by adding further LDE flares. The Catalogue had to be supplemented for the following reasons and aspects:

- a) Continuation in time of the published Catalogue from April 1986 to June 1987, and supplementing of data on LDE flares over the whole cycle 21;
- b) Adding LDE flares from the time intervals of cycles 20 and 21 (May - June 1974, June 1983) for which SAR observations were not available at the time the Catalogue was published;
- c) Correction and adding data for some of the flares already published;
- d) Adding all data for the individual flares which were not included in the Catalogue namely because their duration was at the time limit of 2 hrs.

2. ARRANGEMENT OF SUPPLEMENTS TO THE CATALOGUE OF LDE FLARES (TAB. 1 - CYCLE 20, TAB. 2 - CYCLE 21)

All the LDE flares which are being published additionally in the Supplement are arranged in time sequence. Their catalogue number ties in with the preceding LDE flare in the published Catalogue, as explained in detail in the remarks to the second column of the tables. The selection of LDE flares and the given data are the same in the Catalogue and Supplement. The supplements to the Catalogue of LDE flares are divided according to 11-year cycles:

Tab. 1 contains the data for cycle 20 (January 1969 - May 1976)

Tab. 2 contains data for cycle 21 (June 1976 - June 1987)

The data in the tables are arranged as follows:

Column

- 1 - current number of the flare in the table
- 2 - designation of the LDE flare in the Supplement. The main number is the same as the Catalogue number of the flare which the added flare follows in time; the number in the suffix indicates the number of added flares, e.g. the number 180₃ of the added flare indicates that the flare being added belongs between catalogue flares nos 180 and 181 and that it is the 3rd flare added in this time interval.
- 3 - 11 the same as in Catalogue.

Table 1

Long decay Soft X-ray flares in the 20th cycle - Supplement

(January 1969 - May 1976)
